PROJECTS / OPEN-SOURCE

Password Manager | Link   *Html,TaiwindCss,Javascript,Node.js,Express.js,React.js,MongoDB*
I built a secure password manager web application that allows users to store and manage their credentials with AES encryption. The application features an intuitive dashboard and search functionality for easy access to saved passwords.

FarmConnect | Link   *Html,Tailwind Css , Javascript,Express.js,Node.js,Ejs,MongoDB*
This web page is designed for Contract Farming, which is a system that helps reduce the efforts of both farmers and consumers by streamlining the process of dealing with the market to meet their needs. It connects farmers with buyers, simplifying transactions and ensuring fair practices.

Flipkart Product Review Scraper | Link   *Python , Flask , Html , Css*
This web page is designed to scrape product reviews from Flipkart and display them on the site. It fetches and organizes reviews, allowing users to easily read feedback on products directly from the webpage.

QR Code Generator | Link   *Python , Flask ,Html , Css*
The QR Code Generator web page allows users to create QR codes by entering a link. The generated QR code can be easily downloaded as an image for sharing, offering a simple and user-friendly interface for quick access.

CERTIFICATIONS

- Basic of Python - **Infosys Springboard**
- Python Full Stack - **Eduskills**
- Python Course : Basic to Advanced 2025 - **Udemy**
- Data Analytics job simulation - **Deloitte**

HONORS & AWARDS

- Participated in Skill India Hackthon (SIH)
